

Sheet Metal Duct Tools

Use to fabricate, install, maintain and repair

From the traditional tinner hammer to our patent pending duct tightener, these specialty sheet metal duct hand tools are invaluable to the professional sheet metal duct fabricator and installer. Midwest Tool And Cutlery Company maintains an important relationship with sheetmetal worker JATC training facilities and sheetmetal workers across the country that has resulted in the design and manufacture of sheet metal duct tools specific to the needs of the trade.

FASTER! Time-Saving Designs

Many of these models were designed specifically to speed fabrication and installation processes.

EASIER! One-Hand Operation

All of these tools require only one-hand for operation leaving the other hand free to position material.

SAFER! Heavy-Duty Construction

These models are manufactured of highest quality materials for use by the trades.

Duct Slitter
Scribes a line and pierces light gauge material.

Duct Stretcher
Use to pull duct runs together for cleating.

Duct Tightener
Use to tighten and secure duct runs in place for cleating.

Tinner Hammer
Use to position material, flatten tabs, drive cleats, etc.

Scratch Awl
Use to mark or scribe sheet metal and align holes.

Tension Tool
Use to tighten cable ties securing flex duct to sheet metal fittings.

SHEET METAL DUCT TOOL MODELS

MW-X1 12-Inch Duct Slitter
Use to pierce a starter hole and slit light gauge sheet metal or scribe a line. Forged blade with acrylic handle. Made in USA.

MW-D1 16-Inch Duct Stretcher
Use as a lever to pull duct runs together for cleating. Made of aluminum. Offset handle with Kush'n-kote textured grip. Made in USA.

MW-H1 16 oz. Tinner Hammer
Forged steel head with 8-sided striking face opposite rounded chisel end. Fiberglass shock-absorbing handle with rubber grip. Made in USA.

MW-D2 Duct Tightener
Use to join and clamp duct runs together for cleating. Drive V-slot into duct flanges with hammer. Drive cleat over flanges and remove duct tightener after cleat is in place. Made in USA.

MW-T1 Cable Tie Tension Tool
Use to tighten cable tie securing flex duct to fittings. Cutter handle trims excess cable. Handles all types of nylon cable ties including thin designs. Imported.

MW-A1 3-1/2"(88.9mm) Scratch Awl
Use to scribe mark sheet metal and align holes. Forged of 8630 series steel for long-lasting point. Conveniently stores in end of aviation snip grip. Made in USA.
