

Specialty Tools for
Fabrication, Installation,
Maintenance & Repair

SHEET METAL DUCT TOOLS

FEEL THE DIFFERENCE!

If you care about the quality of the tools you use or sell, you'll appreciate a company that cares about the quality of the tools it makes. Midwest Snips® metal cutting shears are primary to the sheet metal duct trade. Both our snips and our sheet metal duct specialty tool offerings include models designed by sheet metal tradesmen. We take pride in our relationship with the sheet metal worker and are proud to manufacture and offer to them the snips and specialty hand tools that meet their needs.
