Pinnacle[®] Sun

Cool Roof Technology that Fights Smog

According to the Cool Roof Rating Council (CRRC), the average energy savings for a cool roof can be up to 15% of total cooling costs.

Let Your Roof Shine

Introducing Pinnacle[®] Sun architectural shingles - the ultimate combination of style, strength, and performance. These innovative shingles are crafted with the latest 3M[™] technology that combines the algae resistance power of Scotchgard[™] Protector with cutting-edge 3M[™] Smog-reducing Granules and 3M[™] Cool Roof Technology. In addition, Pinnacle[®] Sun shingles carry a UL 2218 Class 3 impact rating, for increased protection against damaging hail.

Cool Coral Canyon SRI: 16

Cool Driftwood SRI: 17

Cool Sand SRI: 19

The Solar Reflectance Index (SRI) is an indicator of the ability of a roof surface to return solar energy to the atmosphere. Roofing material surfaces with a higher SRI will be cooler than surfaces with a lower SRI under the same solar energy exposure, especially on a sunny day. Using materials with higher SRI values can enhance building occupant comfort and reduce air conditioning use. For more information, please reference the Cool Roof Rating Council: CoolRoofs.org

To provide homeowners with the most accurate representation of color options, several photo scans and house shots were used under various lighting conditions. Variations in lighting illustrate the color gradients on asphalt shingle roofs.

Color blends vary from shingle to shingle. Before installation, consult with your contractor and request to view the actual shingles being installed on your roof to ensure confidence in your final color selection.

Dreaming of a Home Redesign?

Get creative with the Atlas roof inspiration center. In the Roof & Home Design Studio, you can upload photos of your home and swipe for different looks. With the Visual Product Selector, you can explore Atlas shingle styles, features, and colors to help you visualize and choose the perfect roof for your home.

Backed by the Power of Scotchgard[™] Protector

Atlas shingles with Scotchgard[™] Protector are the only shingles in the industry with a Limited Lifetime Warranty providing long-term protection against black streaks caused by blue-green algae. This innovative technology, which includes copper-containing granules, allows copper ions to release over time, helping to prevent the ugly streaks caused by algae.

• Prevent Unsightly Black Streaks Caused by Algae

Improving Air Quality One Roof at a Time

Breathe easy with Pinnacle® Sun shingles — the revolutionary roofing solution that not only protects your home but also helps improve air quality with patented 3M™ Smog-Reducing Technology. The 3M™ Smog-reducing Granules found in Pinnacle® Sun shingles are formulated with a photocatalytic coating activated by the sun's UV rays, transforming nitrogen oxide gases in the air around your home into a water-soluble, plant-useable nitrate that washes away with rainwater.

Improving Our Climate
3M™ Smog-Reducing Granules

The Problem

Over time, shingles without proper protection can develop unsightly black streaks caused by blue-green algae.

The Solution

Atlas shingles featuring Scotchgard™ Protector fight algae and unsightly black streaks, keeping your roof looking newer, longer.
