

## PROTECTIVE GUTTER SCREENS

*Gutter protection*

### **AN ECONOMICAL, EASY TO INSTALL GUTTER PROTECTION SYSTEM.**

**VALUE** - Protective Gutter Screens are an economical alternative to hoods and other gutter covers.

**QUICK AND EASY TO INSTALL** - Screens are designed to fit directly over the gutters. A double interlock lip firmly secures the screen to the front of the gutter. Available in 4' lengths for ease of handling and installation.

**PREVENTS CLOGGED AND OVER-FLOWING GUTTERS** - The screen's mesh design helps prevent gutter blockage by large, medium, and small sized debris. It provides for excellent water flow through the rain carrying system for self-cleaning, and debris trapped by the screen is dispersed by the wind.

**A NATURAL FIT** - Because it sits directly on the gutter system it's practically unnoticeable, unlike hooded gutter covers.

**A BEAUTIFUL CHOICE** - Screens come in a standard mill finish or are available with a powder coat finish, enabling home owners to choose from a range of colors to match the gutter, roofing shingle or the home's exterior.
