

SOLAR PANEL CRADLE

Instruction Manual

SB-ASSY-HD

[HD-400 & EH-500]

Parts list:

1. Solar Panel Cradle
2. Hardware bag

Instructions

1. Remove the Solar Panel Cradle and hardware bag from the box.
2. Take two (2) attachment brackets shaped like a “C” and line them up with the pre-drilled holes on the carriage. The carriage should be facing up and you can install the “C” brackets facing inwards. Install using four 3/8x16x1.25” bolts and four 3/8X16 nylon nuts on each bracket
3. Once brackets are installed, lift the Solar Panel Cradle onto the carriage [make sure the straps are facing the track and the pitch is facing toward you]. The holes on the Solar Panel Cradle should line up with the holes on the assembled brackets to the carriage.
4. Secure each hole using the nut and bolt from the provided solar panel hardware bag. Tighten the hardware using a wrench.
