

## Why choose a hoist?

- Don't put your team at risk of injury or hefty fines
- Don't violate OSHA regulations
- Don't operate on someone else's schedule
- Don't lose jobs in hard to reach places for lack of lifting alternative
- Don't wait around for expensive and time consuming permits

**You work hard enough.  
Use a hoist.**

## Why choose Safety Hoist?

### Simple, Safe, Affordable.

#### Dedication

Material hoists have been our only business for 60 years. We've devoted all of our time and effort into making lifting materials a simpler and safer job.

#### Reliability

Our hoists are manufactured entirely in the USA using the highest quality parts we can source. Our gas line is powered by your choice of three dependable brand name engines.

#### Technology

Constant innovation is one of our team's core values. We strive to use the most up to date technology on all of our lines and will continue to pioneer simpler and safer lifting alternative.

#### Responsive

All orders are fulfilled same day from one of our two convenient locations. Our bilingual customer support team is available 24/7. Online tutorials are available for all hoist lines.

# Our Story

## A Focus on American Manufacturing

For 60 years, our sole focus at Safety Hoist Company has been designing and manufacturing platform material hoists. As the building and roofing industries change, we continue to pioneer new ladder hoists and accessories to make moving materials safer, quicker and easier than ever before.

Our veteran owned and operated company manufactures gas and electric ladder lifts for any job. Laddervators are our only business and we put all of our effort into providing the best hoists on the market. Our goal is to provide the simplest, safest and most affordable option. Whether you are installing roofing, siding, skylights, solar panels, or windows, we have a hoist for you. Anytime you need to lift something to a higher elevation, consider a Safety Hoist.

**Nine Models Available**

### Electric Series

## Changing the game

The patented Safety Hoist electric hoist series is the most innovative and user-friendly laddervator on the market. Designed and manufactured with you in mind, our electric series features hoists with weight capacities ranging from 250 to 500 lbs. Safely lift your materials up to 44 feet with just the push of a button.

### Models (PAT 10,961,092)

- EH-250 (250 lb capacity)
- EH-500 (500 lb capacity)

### Key Features

- Ability to raise and lower material
- Pendant controlled allowing operator to stand away from load deck
- Lightweight and extremely portable
- Quick and simple setup- tutorial videos available
- Environmentally friendly
- Manufactured for indoor and outdoor use
- Usable with any household outlet or portable generator (draws less than 10 amps of 110v electricity)
- Dual automatic braking systems for safer operation

### Gas Series

## Optimize any Job

For 60 years, our line of gas powered material hoists have provided simple, safe and affordable material handling alternatives. Using only the highest quality engines, our gas series features five hoists with weight capacities from 200-400 lbs and a max height of 46.5 feet.

### Models

- CH-200 (200 lb capacity)
- VH-300 (300 lb capacity)
- HD-400 (400 lb capacity)
- AH-300 (300 lb capacity)
- AH-400 (400 lb capacity)

### Key Features

- Manufactured entirely in the USA
- Powered by highest quality engines available
- Designed with rugged all-steel construction-durability
- Quick and simple setup with tutorial videos available
- Lightweight and extremely portable
- Unique accessories available
- All units are field serviceable

### Solar Series

## Solar, Simplified

The solar industry needs a simpler and safer way to lift their materials to a higher level. Our solar panel hoist series was manufactured with that in mind. With lifting capabilities of up to 44 feet, our solar series allows the user to safely and securely lift up to six solar panels at a time.

### Models

- SPH-250 (250 lb capacity)
- SPH-500 (500 lb capacity)

### Key Features

- Uses patented electrical hoist technology
- Simple to operate with unique solar panel cradle
- Quick and simple setup with tutorial videos available
- Lightweight and extremely portable
- Pendant controlled allowing operator to stand away from load deck
- Ability to raise and lower up to 500 lbs of materials
- Environmentally friendly
- Usable with any household outlet or portable generator
- Dual automatic braking systems for safe operation
