

GRACE VYCOR™ SELECT™

Self-Adhered Roofing Underlayment

The Performance Choice to Granulars

GRACE VYCOR™ SELECT™ smooth surface roofing underlayment is composed of a rubberized asphalt adhesive laminated to a strong slip-resistant film. This lightweight product makes it faster and easier to install than granulars while meeting or exceeding industry standards for roofing underlayments.

“After using several brands of granular underlayments over the years, I am glad I discovered GRACE VYCOR™ SELECT™. GRACE VYCOR™ SELECT™ is definitely better than any granular underlayments out there and does a much better job. Since it is lightweight, it is easier to work with. Also, it is made by CertainTeed, which gives me peace of mind that my clients’ roofs are well protected. Overall, I am very satisfied with GRACE VYCOR™ SELECT™.”

— Mario Sousa, Caliber Construction

- Offers better adhesion to roof deck
- Lighter weight for easier install
- Proven track record in marketplace

Why GRACE VYCOR™ SELECT™ Roofing Underlayment?

- **Lightweight** for fast and easy installation and great performance
- **Smooth surface provides better lap adhesion** for better protection against leaks, and strong adhesion in low temperatures helps get the job done well the first time
- **Re-roofable** to allow easy removal of shingles from existing GRACE VYCOR™ SELECT™ underlayment, for easier and less-costly retrofit applications
- **High adhesive content** for strong defense against weather and self-sealing around nails. Premium adhesive offers protection against costly call backs
- **Proprietary film surface** features chemical treatment of anti-skid coating and cross-laminated film to provide superior foot traction

Developed by the recognized leader in self-adhered roofing underlayments and the manufacturer of GRACE VYCOR™ ICE & WATER SHIELD®

ROLL WEIGHT	32 lbs.
