

QUAD[®] Butyl Flash

OSI[®] has combined a high-performance butyl adhesive formulation with an innovative synthetic facer to create the all new QUAD[®] Butyl Flash; an easy-to-install, self-adhering tape that provides added protection against the elements in both residential and commercial window and door installations. It delivers optimal moisture and air vapor control that keeps out the elements all season long.

- Apply in temperature range of 20°F-180°F
- Resists UV exposure up to 180 days
- Adheres to most building materials
- Plastic liner peels away cleanly
- Compatible with most sealant products
- Meets or exceeds ASTM-E2112 & AAMA-711 requirements
