Shipping Weight: 230 lbs.

Updated TranzVolt G2 Solar Tilt Kit by Tie Down is an amazing improvement over the previous models. With an extended warranty of 2 years, the TranzVolt G2 system is designed to hold up to the demanding jobsite conditions. The TranzVolt G2 now utilizes AmSteel-Blue high-performance 12-strand single braid of 100% Dyneema® fiber cable. AmSteel-Blue high-performance Dyneema fiber cable has extremely low stretch, superior flex fatigue, and wear resistance. The eco-friendly TranzVolt G2 eliminates the need for the messy and costly life cycle use of fuel and oil. The Solar Tilt Kit carries material as high as 44 ft. at a rate of 2 ft. per second. The TranzVolt can reach the height of a two-story building in under 25 seconds. Using two standard DeWalt Brand 20V batteries or Milwaukee Brand 18V rechargeable batteries, the Solar Tilt Kit offers a full 8 hours while lifting up to 250 lbs. Lift material such as solar panels, plywood, windows, and doors with the TranzVolt Pro Solar Tilt Kit. This product is a great tool for lifting material in tight spots or when low noise ordinances are being enforced. When the TranzVolt Solar Tilt Carriage reaches the top of the track, the Tilt Carriage pivots to allow workers to safely remove material.

* Batteries (not included)
